A founding partner of the firm, Beth has broad experience in the management, design and implementation of a wide range of projects, both large and small, including feasibility studies, adaptive reuse, renovation and new buildings. She has extensive experience and depth of knowledge in creating design and technical solutions for many building types. She employs a highly responsive programming and design approach that yields specific and unique results for commercial, educational, residential, and religious structures.

SUNY System Administration Offices (SUNY Plaza) - Albany, NY

Principal and Designer for the gut-renovation to the south wing of the 1st floor of the SUNY Admin building. The 9,000 sf space was redesigned to include two updated office suites.

United States Veterans Administration, VA National Cemetery - Saratoga, NY

Design and construction documents for multiple new buildings in conjunction with the Gerald B.H Soloman VA Cemetery

Princeton University - Blair, Holder, Hamilton, and Madison Halls - Princeton, NJ

Project Manager for the rehabilitation of a series of Collegiate Gothic buildings. Blair, Holder and Hamilton Halls serve as residence halls, while Madison Hall houses dining halls, student lounges, a library, a theater, computer labs, and College administrative offices. Work included the complete restoration of interiors and exteriors. All new building systems were threaded through the existing fabric.

Cornell University, Repairs to Delta Kappa Epsilon Lodge - Ithaca, NY

Project Manager for the repair of the entry stairs and elevated walkway for the robust Richardsonian Romanesque fraternity house built in 1893.

St. Anthony's Church - Schenectady, NY

Master Plan and interior and exterior renovation of the Roman Catholic Church, which was severely damaged by fire in 2014. The project included recreating as much of the original decorative interior as funding would allow, while also addressing liturgical changes and improving accessibility. A new interior design highlighted the architecture, including the surviving wood truss ceiling and recreating stained glass windows that were destroyed in the fire.

The Following projects for U.S. Department of State - Bureau of Overseas Buildings Operations:

- **United States Embassy - Rome, Italy**
Evaluations and recommendations for upgrades to multiple historic buildings on the embassy compound to accommodate new electrical and HVAC systems.
- **United States Embassy - Buenos Aires, Argentina**
Restoration and renovation of the historic ambassador's residence
- **United States Embassy - Canberra, Australia**
Restoration and renovation of the historic ambassador's residence
- **United States Consulate - Shanghai, China**
Renovation of historic building to upgrade mechanical and electrical systems, and conversion of existing space into Consulate General's office space
- **United States Consulate - Istanbul, Turkey**
\$7 Million restoration of existing historic consulate and annex buildings
